RIDE WITH CONFIDENCE

The
answer
for
every condition

1

Improved visor system

- Additional visor position
- Avoids fogging of visor
- Better air supply

2

New designed QSV-2 sun visor

- Bigger view area
- Less light distraction

3

Prepared for SENA SRL2 communication system

- Perfect integration into the helmet
- No protruding operation unit
- Helmet design is not affected

5

4

Optimised chinstrap position

- Avoids pressure on the throat
- Improved wearing comfort

5

QSV locking mechanism

- Simplifies changing the sun visor

New!

The new

GT-Air 2

Safety

- **Shell from AIM**
„Organic fiber“ and „multi composite fiber“ in various layers for a shock absorbent shell with optimum rigidity
- **EPS-Linersystem with different densities**
Optimised protection through EPS elements with different shock absorbing levels
- **Mist retardant CNS-1 Pinlock® visor**
Fast and easy to change
- **Micro ratchet system**
 - Made from stainless steel
 - Easy to handle, always perfectly adjusted

Wearing comfort

- **QSV-2 sun visor**
 - DIN EN1836 approved
 - Increased shading area
- **3 different outer shell constructions**
For perfect fit and compact dimensions
1) XS-M, 2) L, 3) XL-XXL
- **3D centre pad, detachable, washable**
For pleasant wearing comfort
- **Cheek pads detachable, washable**
For better care and individual adjustment
- **Chinstrap cover detachable, washable**
Easy to maintain and clean
- **Ear pads**
To reduce noise
- **Prepared for Intercom installation**
Specially designed to integrate the SENA SRL2 communication system

Ventilation

- **Multiple venting and extraction**
For optimum ventilation performance
- **Inlets at the upper head and chin**
Fresh air supply guaranteed
- **Outlets at the rear and neck**
To exhaust warm air
- **New visor position**
 - Prevents fogging of the visor
 - Better air supply

Aerodynamics

- **Integrated spoiler**
For optimised aerodynamical performance

AIM+

7

6 ply shock absorbent fiber shell

- Multi-composite & high performance fiber layers
- High strength, light weight
- Optimal elasticity

Safety

- **Shell in AIM+**
Organic fibre, multi-composite and high-performance fibre in various layers for a shock-absorbent shell with optimum rigidity
- **Modular EPS liner system with multi densities**
Optimised protection through EPS elements with different shock-absorbing levels
- **Mist-retardant CWR-F Pinlock® visor**
 - 2-dimensional shape for easy application of tear-offs
 - Vortex generators for advanced aerodynamic performance
- **Double D-Ring**
Easy to use and always perfectly adjusted
- **Security system**
E.Q.R.S. (Emergency Quick Release System) for easy helmet removal in case of an accident

Wearing comfort

- **4 different outer shell sizes**
For perfect fit and compact dimensions.
Sizes: 1) XS-S, 2) M, 3) L, 4) XL-XXL
- **3-dimensional cheek-pad**
Optimised fitting
- **Modular centre-pad**
For individual adjustment
- **Cheek-pads and centre-pad detachable**
For easy cleaning
- **Detachable and washable chinstrap cover**
For better care

Ventilation

- **New Cheek Vent System**
Active cooling even in the lower part of the helmet
- **6 closable air inlets and 6 air outlets**
Optimum ventilation performance for sport-riding

Aerodynamics

- **Sophisticated aerodynamic system**
To reduce drag and lift and avoid shaking
- **Rear stabilizer with equipped flaps**
2 sizes of flaps available, for different conditions
- **Lower air spoiler**
Controlled airflow around the lower part of the helmet

Off-Road Helmets

3D Cones absorb rotational energy

1

M.E.D.S. (Motion Energy Distribution System)

– The main layer of EPS liner absorbs impacts from the usual, while an additional centre layer of EPS liner reduces rotational acceleration energy to the head in the event of an accident.

– Significant reduction of rotational force to the rider's head
– More technically advanced than any existing conventional dual liner system

Safety

- **Shell in AIM+**
Organic fibre, multi-composite and high-performance fibre in various layers for a shock-absorbent shell with optimum rigidity
- **M.E.D.S. (Motion Energy Distribution System)**
Additional layer of EPS liner reduces rotational acceleration energy to the head in the event of an accident
- **3-piece EPS liner system**
Optimised protection through EPS elements with different shock-absorbing levels
- **E.Q.R.S. (Emergency Quick Release System)**
Simplifies helmet removal by removing the cheek pads in the event of an accident
- **Double D-Ring**
Easy to use and always perfectly adjusted

vi- sion

**photochromic technology
for a safer, more enjoyable
ride.**

Transitions™ Adaptive Visor

Motorcyclists know how important a clear, crisp vision is. Traditionally, riders deal with changing light conditions by carrying two shields (one clear, one tinted) with them at all times.

Transitions® adaptive visors solve this problem – and even enhance vision – by seamlessly adjusting to optimised darkness levels with the changing light.

seamless

Designed to meet the international Standards

- Transitions® Optical has been an industry leader in photochromic technology for 20 years and is known worldwide for its photochromic prescription eyeglasses.
- UV protection: the visor blocks 100% of UV rays
- Full activation in 2 minutes
- Impact resistant

Photochromic Molecules make light, dark, and every shade in between possible

- When Transitions® lenses are exposed to UV light, trillions of photochromic molecules in the lens begin to change structure. This reaction is what causes the lenses to darken.
- The superiority of Transitions® brand technology lies in their exclusive, patented formulas. The molecules constantly and smoothly recalibrate so the optimal amount of light reaches your eyes whether you're in bright sunlight or under cloud cover.

Visors
