Don't miss our exclusive chat
with Alex on shoei-europe.com

Alex,
what's
next?

Born *from*

→ Racing.

Track certified by the fastest rider on the planet, the X-SPR Pro is a proven race weapon. Every detail was carefully designed, tested and tuned, until this uncompromised masterpiece was born.

X-BP2

P20

Experience pure MotoGP performance.

New

1

Emergency Quick Release System

- E.Q.R.S. rescue system
- For easy helmet removal in case of an accident
- Pull to remove cheek pad

2

Highly sophisticated aerodynamic system

- (A) Lower air spoiler
- (B) Vortex generators
- (C) Integrated spoiler
- (D) Rear flaps
- Reduction of drag and lift

EQRS

350

Race focused shape. High efficiency aerodynamics for high speeds up to 350 km/h. Stabilizer equipped with rear flaps which provide stability during braking.

TECH

8

6 ply shock-absorbent shell in AIM+

- Multi-composite and high performance fiber layers
- High strength, light weight
- Optimal elasticity

Safety

- ECE 22/06 - FIM homologation
- **Shock-absorbent shell in AIM+**
Organic fibre, multi-composite and high-performance fibre in various layers for a shock-absorbent shell with optimum rigidity
- **EPS liner system with multiple densities**
Optimised protection through EPS elements with different shock-absorbing levels
- **Mist-retardant CWR-F2R Pinlock® visor**
 - 2D shape for easy application of tear-offs
 - Double secured visor lock system
 - Vortex generators for advanced aerodynamic performance
- **Double D-Ring**
Easy to handle, always perfectly adjusted
- **E.Q.R.S. security system**
Emergency Quick Release System for easy helmet removal in case of an accident

Wearing comfort

- **4 different outer shell sizes**
For perfect fit and compact dimensions (XXS-S / M / L / XL-XXL)
- **Modular centre pad, detachable, washable**
Pleasant wearing comfort
- **Cheek pads detachable, washable**
In different thicknesses for individual adjustment
- **Chinstrap cover detachable, washable**
For better care

Ventilation

- **High performance racetrack ventilation**
- **Innovative cheek vent system**
Active cooling even in the lower part of the helmet
- **7 closable air inlets and 6 air outlets**
Multiple venting and extraction

Aerodynamics

- **Sophisticated aerodynamic system**
Reduces drag and lift and avoids shaking, for high speeds up to 350 km/h
- **Rear stabilizer with flaps**
Rear flaps provide stability during braking
- **Lower air spoiler**
Controlled airflow around the lower part of the helmet

Transitions™

Adaptive Visor Techno- *logy*

Photochromic technology for a safer, more enjoyable ride.

Motorcyclists know how important a clear, crisp vision is. Traditionally, riders deal with changing light conditions by carrying two shields (one clear, one tinted) with them at all times.

Transitions® adaptive visors solve this problem and even enhance vision by seamlessly adjusting to optimised darkness levels with the changing light.

seamless

Designed to meet the international standards

- Transitions® Optical has been an industry leader in photochromic technology for 20 years and is known worldwide for its photochromic prescription eyeglasses.
- UV protection: the visor blocks 100% of UV rays
- Full activation in 2 minutes
- Impact resistant

Photochromic molecules make light, dark, and every shade in between possible

- When Transitions® lenses are exposed to UV light, trillions of photochromic molecules in the lens begin to change structure. This reaction is what causes the lenses to darken.
- The superiority of Transitions® brand technology lies in their exclusive, patented formulas. The molecules constantly and smoothly recalibrate so the optimal amount of light reaches your eyes whether you're in bright sunlight or under cloud cover.
